

DORRABB KHAN

Senior DevOps & Cloud Engineer, *adnymics/ParcelDealz GmbH*, Munich, Germany
0162 4353243 | dorrabbkhan.github.io | dorrabbk@gmail.com | linkedin.com/in/dorrabbkhan

PROFILE INTRODUCTION

Senior DevOps & Cloud Engineer driving scalable cloud-native architectures, FinOps cost optimization, and CI/CD automation. Progressed rapidly from Working Student to Senior Engineer by consistently designing high-availability systems, including a scalable SaaS backend processing 2.5M monthly requests with sub-300ms latency. Proven ability to modernize legacy infrastructure, slash operational costs, and establish robust observability frameworks across cloud environments.

CORE COMPETENCIES

DevOps: Jenkins, Ansible, Git, CI/CD, Kubernetes, Docker

Cloud: AWS, GCP, Terraform, Firebase

Programming: Javascript/Typescript, Python, Rust, C/C++, Bash

Frameworks/Databases: NestJS, NextJS, Pandas, NumPy, PostgreSQL, MySQL, Redis

Observability: DataDog, CloudWatch, Grafana, Loki, Prometheus

Languages: English (C2), German (B2), Urdu (C2), Pashto (C2), Hindi (Spoken only)

KEY ACHIEVEMENTS

- Built and scaled AWS backend architecture for our SaaS to handle **2.5M+ monthly requests at 99.99% availability and sub-300ms latency**, serving as the technical backbone for 60+ enterprise clients.
 - **73% cost reduction** in core AWS infrastructure spend via EC2/RDS rightsizing and Savings Plans, and **90% reduction in observability costs** by architecting a custom Loki/Grafana/Prometheus stack.
 - **Sped up deployment cycles by 85%** and transformed developer platform engineering by designing containerized environments (Docker/Ansible) and vastly more streamlined automated deployment pipelines.
 - Functioned as the **primary technical liaison for 60+ active high-touch B2B clients** while routinely **presenting cloud architecture decisions** to the Board of Directors, CTO, and Product teams.
-

WORK EXPERIENCE

Senior DevOps Engineer

adnymics & Parceldealz München

Jan 2020 - Present

(Promoted progressively: Working Student -> Junior Software Engineer -> DevOps Engineer -> Senior DevOps Engineer)

- **Cloud-Native Lean Architecture:** Designed and built cloud-native infrastructure (ECS, RDS, S3, Route53, Lambda, VPC) processing upto 2.5M+ requests monthly with sub-300ms latency and 99.99% uptime while minimizing compute waste.
- **~90% Observability Cost Reduction:** Architected the migration from DataDog to a Loki/Grafana/Prometheus stack hosted on AWS, slashing monthly observability costs by up to 90% across on-premise and cloud infrastructure.
- **~73% Cloud Cost Reduction:** Slashed infrastructure spend by executing comprehensive FinOps strategies, including EC2/RDS rightsizing, Reserved Instances/Savings Plans, automated test-environment teardowns, and S3 lifecycle policies.

- **CI/CD & Developer Platform Engineering:** Engineered automated CI/CD pipelines (BitBucket, GitLab, GitHub, Jenkins) that accelerated deployment speed by ~85%. Designed containerized dev environments (Docker, Ansible) supporting X engineers, streamlining and reducing local onboarding setup time.
 - **Systems Programming & Migration:** Migrated legacy codebase (14 microservices) from Python 2.7 to modern Python 3.x; engineered a high-throughput microservice pipeline from scratch using Rust and AWS SQS for real-time cloud message processing.
 - **Customer Success & Technical Operations:** Directed technical onboarding, offboarding, and feature requests for a portfolio of 60+ active B2B clients. Streamlined client troubleshooting and architectural implementations while maintaining strict SLA compliance.
 - **Stakeholder Management & Technical Translation:** Translated complex architectural decisions, cloud infrastructure changes, and technical trade-offs into tailored narratives for diverse audiences, ranging from the Board of Directors and the CTO to Product teams and junior developers. Held regular presentations and “Tech Talks” for 30+ colleagues.
 - **Mentorship & Hiring:** Actively led technical recruiting (CV screening, live coding evaluations) and mentored junior engineers on software engineering best practices, CI/CD automation, and cloud tools.
 - **Technical Documentation & Standards:** Authored extensive technical documentation, including Architecture Decision Records (ADRs), system schemas, user tutorials, and code review standards.
-

EDUCATION

MSc. in Artificial Intelligence (Part-time)

Friedrich-Alexander-Universität - Erlangen-Nürnberg

Apr 2026 – Present

Current GPA: 1.23 (German scale)

BSc. in Robotics and Intelligent Systems

Constructor University Bremen (formerly Jacobs University)

Jan 2019 – Jun 2022

GPA: 1.43 (German scale) - Summa cum laude with the highest GPA for the Major in the Class of 2022

ACTIVITIES & HOBBIES

Founder | Ilm Abroad Pakistan

Founded an educational project in 2025 to help 10+ students from Pakistan navigate their educational journeys abroad, mainly targeting Germany and other European countries. Continuously working with prospective students, aiding them in the nuances of university, scholarship and visa applications.

Various Roles | Jacobs University Bremen

Mentored 80+ members as Technical Lead for the Google Developer Student Club, won the Google DSC EU-wide Ideathon 2022 as Team Leader and a Top 50 global finish in the Google DSC Solutions Challenge in 2023. Served as the **primary representative for 400+ students** of all five engineering majors as **Focus Area Representative for Engineering**. Concurrently **elected to the Student Parliament**, managed student-event financing as **Member of Financial Affairs Committee**, and liaised with the faculty as **Member of Academic Affairs Committee**. **Launched an online tech courses program (JSchool)**, enabling fellow students to teach local children in Bremen and taught an HTML/CSS course myself.

Fitness Interests | Various Sports

National-level finalist and team captain in Futsal (5-a-side football) at High School (2017). Various 11-a-side football tournament participations and wins from high school to university. Currently transforming sports interests to casual football as well as other sports such as weight training, volleyball, running and bouldering.
